

Spring 2018

# FLORIDA ECON CHALLENGE

## AN ONLINE COMPETITION For High School Students

The Florida EconChallenge combines the excitement of an athletic competition with academic excellence and encourages students to apply their economics knowledge in this fast paced quiz. During this competition, teams of high school students answer questions on microeconomics, macroeconomics, international economics, and current events.

This FREE online competition is the first round of three to determine the overall champions of the 2018 National Economics Challenge. The first place winners of the Florida competitions are awarded trophies and prizes. Winners will also advance to the National Semi-Finals to compete with winning teams across from the United States!

The top four teams in each division of the National Semi-Finals will **win an all-expenses paid trip to New York City** to compete in the Finals of the National Economics Challenge in May 2018.
